CLAIMS OF THE APPLICATION:

- (Original) A compound, which is an amorphous form of ziprasidone hydrochloride.
- (Canceled).
- (Original) The compound of claim 1, wherein said amorphous form of ziprasidone hydrochloride has a moisture content between about 0.5 and about 4.5% by weight.
- (Original) The compound of claim 1, wherein said amorphous form of ziprasidone hydrochloride has a moisture content between about 3.5 and about 4.5% by weight.
- (Original) The compound of claim 1, wherein said amorphous form of ziprasidone hydrochloride has a moisture content between about 4.0 and about 4.5% by weight.
- (Original) A composition comprising ziprasidone hydrochloride as a solid, wherein
 at least 80% by weight of said sold ziprasidone hydrochloride is an amorphous form of
 ziprasidone hydrochloride.
- (Original) The composition of claim 6, wherein at least 90% by weight of said solid ziprasidone hydrochloride is the amorphous form.
- (Original) The composition of claim 6, wherein at least 95% by weight of said solid ziprasidone hydrochloride is the amorphous form.
- (Original) The composition of claim 6, wherein at least 99% by weight of said solid ziprasidone hydrochloride is the amorphous form.

10-12. (Canceled)

- (Original) A pharmaceutical composition comprising the compound of claim 1 and one or more pharmaceutically acceptable excipients.
- 14. (Original) The pharmaceutical composition of claim 13, wherein said composition is a solid dosage form for oral administration.
- (Original) The pharmaceutical composition of claim 13, wherein said dosage form is a tablet.
- 16. (Previously amended) A method of treating schizophrenia or its symptoms, comprising administering to a patient in need of such treatment an effective amount of the compound of claim 1.
- (Withdrawn) A process for making ziprasidone hydrochloride, wherein said process comprising converting ziprasidone to ziprasidone hydrochloride.
- 18. (Withdrawn) A process for making an amorphous form of ziprasidone hydrochloride, wherein said process comprising converting ziprasidone to ziprasidone hydrochloride.
- 19. (Withdrawn) The process of claim 18, wherein said ziprasidone is a crystalline form, an amorphous form or a mixture thereof.
- (Withdrawn) The process of claim 18, wherein said ziprasidone is a crystalline form.
- 21. (Withdrawn) The process of claim 18, wherein said ziprasidone is an amorphous form.
- 22. (Withdrawn) A process for making an amorphous form of ziprasidone hydrochloride, said process comprising:
 - a. providing a ziprasidone hydrochloride solution in an aqueous alcoholic solvent;
 - b. removing said solvent, thereby forming a solid mass; and
 - c. isolating said solid mass, which is the amorphous form of ziprasidone hydrochloride.

- 23. (Withdrawn) The process of claim 22, wherein said aqueous alcoholic solvent is a mixture of water and an alcohol selected from the group consisting of ethanol, methanol, propanol, t-butanol, n-butanol, isopropanol, and mixtures thereof.
- 24. (Withdrawn) The process of claim 22, wherein said aqueous alcoholic solvent is a mixture of water and isopropyl alcohol.
- 25. (Withdrawn) The process of claim 22, wherein said ziprasidone hydrochloride solution is provided by a process comprising mixing ziprasidone in acetic acid with aqueous hydrochloric acid solution.
- 26. (Withdrawn) The process of claim 25, wherein said ziprasidone is a crystalline form, an amorphous form or a mixture thereof.
- 27. (Withdrawn) The process of claim 25, wherein said ziprasidone is a crystalline form.
- 28. (Withdrawn) The process of claim 25, wherein said ziprasidone is an amorphous form.
- 29. (Withdrawn) The process of claim 25, wherein said mixing is done at a temperature between about 30° C. and about 70° C.
- 30. (Withdrawn) The process of claim 25, wherein said mixing is done at a temperature between about 40° C. and about 50° C.
- 31. (Withdrawn) The process of claim 25, wherein said process for providing the ziprasidone hydrochloride solution further comprises heating to an elevated temperature.
- 32. (Withdrawn) The process of claim 25, wherein said process for providing the ziprasidone hydrochloride solution further comprises heating to reflux temperature.

- (Original) An amorphous form of ziprasidone hydrochloride, which is prepared according to the process of claim 18.
- 34. (Original) An amorphous form of ziprasidone hydrochloride, which is prepared according to the process of claim 22.
- 35. (Withdrawn) A compound which is a crystalline form of ziprasidone having an X-ray diffraction pattern, expressed in terms of 2 theta angles, that includes four or more peaks selected from the group consisting of 16.34±0.009, 12.21±0.009, 25.16±0.009, 27.02±0.009, 24.21±0.009, 5.26±0.009 and 18.51±0.009 degrees.
- 36. (Withdrawn) The compound of claim 35, having an X-ray diffraction pattern, expressed in terms of 2 theta angles, that includes four or more peaks selected from the group consisting of 16.335, 12.209, 25.156, 27.019, 24.21, 5.255 and 18.511 degrees.
- 37. (Withdrawn) The compound of claim 35, having an X-ray diffraction pattern, expressed in terms of 2 theta angles, that includes peaks of 16.335, 12.209, 25.156, 27.019, 24.21, 5.255 and 18.511 degrees.
- 38. (Withdrawn) The compound of claim 35, having substantially the same X-ray diffraction pattern as shown in Figure 2.
- 39. (Withdrawn) A composition comprising ziprasidone as a solid, wherein at least 80% by weight of said solid ziprasidone is a crystalline form having an X-ray diffraction pattern, expressed in terms of 2 theta angles, that includes four or more peaks selected from the group consisting of 16.34±0.009, 12.21±0.009, 25.16±0.009, 27.02±0.009, 24.21±0.009, 5.26±0.009 and 18.51±0.009 degrees.
- 40. (Withdrawn) The composition of claim 39, wherein at least 90% by weight of said solid ziprasidone is said crystalline form.

- 41. (Withdrawn) The composition of claim 39, wherein at least 95% by weight of said solid ziprasidone is said crystalline form.
- 42. (Withdrawn) The composition of claim 39, wherein at least 99% by weight of said solid ziprasidone is said crystalline form.
- 43. (Withdrawn) A pharmaceutical composition comprising the compound of claim 35 and one or more pharmaceutically acceptable excipients.
- 44. (Withdrawn) The pharmaceutical composition of claim 35, wherein said composition is a solid dosage form for oral administration.
- 45. (Withdrawn) The pharmaceutical composition of claim 44, wherein said dosage form is a tablet.
- 46. (Withdrawn) A method of treating a psychosis, comprising administering to a patient in need of such treatment an effective amount of the compound of claim 35.
- 47. (Withdrawn) A process for preparation of a crystalline form of ziprasidone, said process comprising:
 - a. providing a solution of a salt of ziprasidone in an alcoholic solvent;
 - b. treating said solution with an aqueous basic solution thereby forming a precipitate; and
 - c. isolating the precipitate, which is said crystalline form of ziprasidone.
- 48. (Withdrawn) The process of claim 47, wherein said salt of ziprasidone is ziprasidone mesylate.
- 49. (Withdrawn) The process of claim 48, wherein said ziprasidone mesylate is prepared by a process comprising reacting 6-chloro-5-(2-chloroethyl)oxindole with 3-(1-piperazinyl)-1,2benzisothiozole.

- 50. (Withdrawn) The process of claim 47, wherein said alcoholic solvent is methanol.
- (Withdrawn) The process of claim 47, wherein said aqueous basic solution is aqueous caustic lye solution.
- 52. (Withdrawn) The process of claim 47, wherein said aqueous basic solution is aqueous sodium hydroxide solution or aqueous potassium hydroxide solution.
- 53. (Withdrawn) A pharmaceutical composition comprising the compound of claim 35 and one or more pharmaceutically acceptable excipients.
- 54. (Withdrawn) The pharmaceutical composition of claim 53, wherein said composition is a solid dosage form for oral administration.
- 55. (Withdrawn) The pharmaceutical composition of claim 54, wherein said dosage form is a tablet.
- 56. (Withdrawn) A crystalline form of ziprasidone, which is prepared by the process of claim 47.
